WHY MSA SECURITY CONSULTING WORKS

- With our consulting team working directly alongside the rest of MSA's subject matter experts, we can quickly and easily draw upon all of the knowledge and skill sets present inside of MSA. ***Frequent collaboration between the full MSA team gives our clients access to the broadest range of expertise in the industry.***
- We offer solutions that are customized and tailored exactly to your requirements and business goals. ***Creative solutions are designed specifically for each company's situation.***
- Our unique working environment encourages collaboration between our experts and across multiple disciplines. ***A more effective internal workflow enables us to fully understand situations and come up with superior solutions.***
- Our diverse range of programs includes intelligence analysis, continuity of operations planning and physical security design, along with full access to all of MSA's business lines including System Integration, Training and Investigations. ***More comprehensive services offer our clients more comprehensive solutions.***

MSA SECURITY CONSULTING HAS ACCESS TO THE FULL BREADTH OF MSA, GIVING CLIENTS THE BROADEST RANGE OF SUBJECT MATTER EXPERTS IN THE INDUSTRY.

MSA SECURITY CONSULTING MAINTAINS BUSINESS-AS-USUAL

- A major national packaged goods distributor was experiencing a very high loss rate. The MSA Consulting Team was brought in to assess the situation, and to develop and implement a program to mitigate losses. The resulting program not only discovered the cause of the product loss, but also shed light on a narcotics operation and several other abuses all contributing to severe loss of productivity. MSA was able to provide specialized consulting along with policy and procedure review and revision to mitigate and prevent further loss.
