

# SECURITY TRAINING

**DEPLOYED FOR:** COUNTERTERRORISM TRAINING • TACTICAL SECURITY SERVICES • MARITIME TRAINING • IED/EXPLOSIVES RECOGNITION TRAINING • X-RAY SCREENER TRAINING • ACTIVE SHOOTER RESPONSE TRAINING • SECURITY GUARD TRAINING

MSA provides specialized training services that encompass all aspects of facility, personnel and perimeter security. In addition to our X-ray Screening and Explosive Recognition training, MSA provides training in a wide range of areas, including Counterterrorism, Maritime and Tactical Security. Our certified instructors, recognized as subject matter experts in their fields, use customized training modules, realistic training aids and a hands-on approach to provide your personnel with the highest level of security training services available.

## WHY MSA SECURITY TRAINING SERVICES WORK

- Our training is customized to increase security personnel's awareness of valid threats. ***Advice and recommendations are tailored to your perceived threats.***
- Training is done by subject matter experts, including bomb technicians and bomb squad commanders, in a wide range of areas including Counterterrorism, Maritime and Tactical Security. ***Expert instructors cover actual scenarios encompassing all areas to reduce overall risk.***
- MSA constantly monitors real world global trends and analyzes threats. ***Techniques are developed based on actual events and threats and are updated constantly.***
- MSA provides an analytical view of the terror threat on the strategic, operational and tactical levels for both security personnel and managers. ***When everyone understands the procedures, threats can be dealt with more efficiently.***

**MSA SECURITY CAN RESEARCH, DEVELOP AND TRAIN  
A SECURITY FORCE ON ANY TOPIC, MAKING SECURITY  
MORE EFFICIENT AND BUSINESSES MORE SUCCESSFUL.**

## MSA SECURITY TRAINING MAINTAINS BUSINESS-AS-USUAL

- A large client that had taken part in our X-ray Screening training received a musical greeting card in the mail which contained explosive devices. The explosives were successfully detected by the staff during X-ray screening, and law enforcement personnel were called. The incident was successfully handled, preventing harm or detriment to operations.
