Best Practices for Phased Reopening

As you plan your organization's restart, it is helpful to leverage best practices and lessons learned from other parts of the world. MSA is picking up common themes from partner organizations and clients around the world, from social distancing strategies to disinfectant approaches. **Click on each country for more information**

HONG KONG

Phased Reopening Began:

May 4, 2020

Hong Kong's government is distributing reusable masks to each of the city's 7 million residents. The antimicrobial masks use a magnetic field to provide effective filtration.

SINGAPORE

Phased Reopening Begins:

May 12, 2020

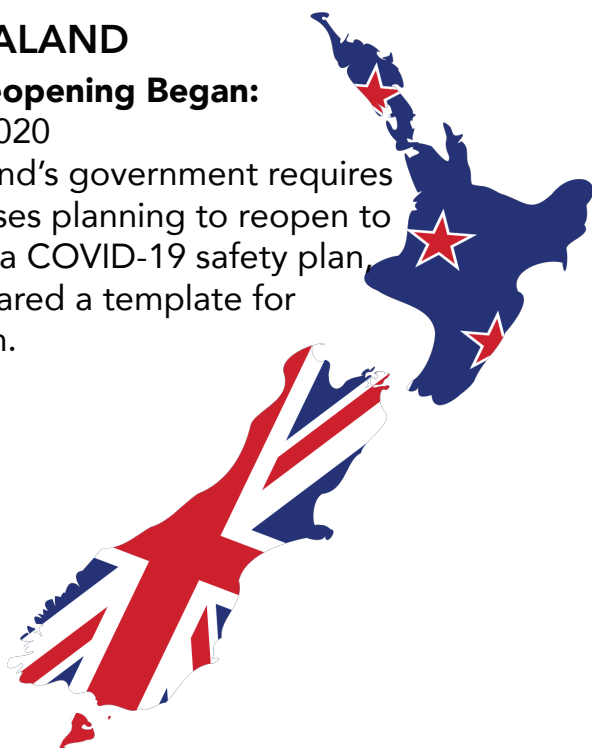

Singapore is hiring thousands of furloughed and unemployed citizens to serve as social distancing ambassadors, educating the public and enforcing regulations in public spaces.

NEW ZEALAND

Phased Reopening Began:

April 28, 2020

New Zealand's government requires all businesses planning to reopen to document a COVID-19 safety plan, and has shared a template for completion.

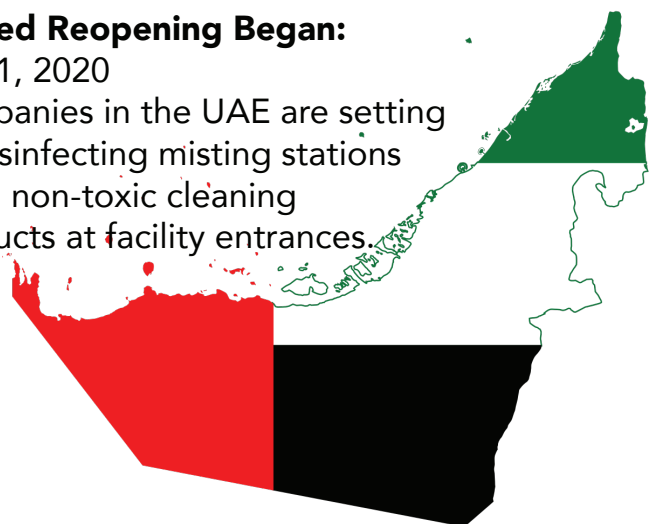

UNITED ARAB EMIRATES

Phased Reopening Began:

May 1, 2020

Companies in the UAE are setting up disinfecting misting stations using non-toxic cleaning products at facility entrances.

UNITED KINGDOM

Phased Reopening Begins:

May 7, 2020

The UK government is taking measures to ease regulatory burdens, increasing the availability of personal protective equipment and sanitizing supplies in the marketplace.

CANADA

Phased Reopening Began:

May 4, 2020

City governments are redeploying bylaw officers from their standard duties, such as parking enforcement, to enforce social distancing regulations instead.
