TURN-KEY SOLUTION

MSA Security®, An Allied Universal® Company, provides a turn-key complete screening solution for high-profile threat environments. Experts on our team evaluate all of your screening needs to develop a customized solution that includes equipment, training, and remote support. We take the hassle and burden off your shoulders to enhance your facility security and deliver peace of mind.

SCREENING EQUIPMENT

MSA provides options for the lease, purchase, delivery, installation, and maintenance of today's most sophisticated, flexible, and portable X-ray equipment. We offer a range of equipment options from small portable units suitable for checkpoint screening, to large units capable of screening cargo pallets or even vehicles. Our technicians recommend the right devices for your unique screening configuration and price point, and offer support for all leading X-ray manufacturers.

SCREENER TRAINING

Online and onsite screener training focuses on X-ray interpretation, explosives recognition, IED awareness, and more. Custom programs, designed by FBI-trained bomb technicians, align with your specific screening environment and threat concerns, and are rooted in an extensive library of real-world images. Ongoing updates and informational bulletins regularly communicate trends, timely tips, and images screeners are likely to face in the current landscape

SMARTTECH® REMOTE X-RAY SCREENER SUPPORT

Experienced, well-trained screeners are a crucial component of successful detection. Yet in high-threat scenarios, a greater level of expertise is required to quickly identify and assess challenging IED presentations.

MSA's patented SmartTech® solution integrates with existing X-ray equipment, enabling onsite screeners access to MSA's Emergency Operations Center in real time, 24 hours a day / 365 days a year. Our FBI-trained bomb technicians resolve suspicious images in seconds without operational disruption.

MSA can also deploy a master screener to your location for a heightened on-site protection program.

MSA EXPLOSIVES DIGEST

MSA keeps you up to date on emerging threats by delivering breaking news about issues affecting your perimeter security program. Experienced bomb technicians gather and vet open source intelligence reports from around the world each day. The MSA Explosives Digest covers trends in terrorism, explosive screening and detection, changes in the National Terrorism Advisory System and many other timely topics of interest.

In 2004, the Department of Homeland Security designated MSA's SmartTech® under the SAFETY Act (Support Anti-Terrorism by Fostering Effective Technology). This designation greatly reduces the risk of clients' liability in the event a terrorist attack occurs while SmartTech® is deployed in the defense against, response to, or recovery from an act of terrorism.
