

BOMB DOGS

DEPLOYED FOR: VEHICLE & TRUCK INSPECTIONS • INTERIOR & EXTERIOR BUILDING SWEEPS • CHECK-POINT OPERATIONS • CARGO INSPECTIONS • MASS AREA SWEEPS

Canine units are by far the most efficient and productive way to search for explosives in active environments. A well-trained dog/handler team is more effective than other methods of explosives detection and can be a good deterrent for attacks, due simply to the visibility of the dogs.

WHY MSA BOMB DOG TEAMS ARE MORE EFFECTIVE

- MSA is the largest private provider of single-purpose/single-handler Explosive Detection Canine (EDC) services in the United States. ***Our focused dog/handler teams are selected for one purpose, detecting explosives to mitigate risk to your personnel and property.***
- Our state-of-the-art EDC Training Academy serves as the central location for all phases of the MSA comprehensive bomb dog and handler training program. ***The best dogs start with the best training.***
- MSA is licensed by the ATF so we can use real explosives, including homemade explosives, to train all our bomb dogs and ensure optimum performance. ***Being trained with real explosive materials gives our dogs and trainers an edge that is unattainable in a standard training environment.***
- MSA's training staff includes a full-time staff of handlers who come from law enforcement and military backgrounds. Our team is fully trained in counter-surveillance and behavioral recognition. ***Unparalleled experience in the field creates the best dog/handler teams in existence.***
- The majority of MSA's canines are from the sporting breeds, selected for their highly developed olfactory capabilities, intelligence, stable temperament, drive, good health, and eagerness to please. ***Dogs that are genetically suited for detecting explosives are more successful and have longer careers.***
- MSA is the only private company to have bomb dog teams certified by the Department of Defense, U.S. Army in accordance with Army Regulation 190-12, and was one of the first four companies in the nation whose services were certified under the DHS SAFETY Act. ***We continually invest in certifications to ensure our dog teams are up to the highest standards.***

MSA BOMB DOG TEAMS ARE ALL TRAINED DOMESTICALLY AND DEPLOYED GLOBALLY TO SOME OF THE MOST TARGETED AREAS IN THE WORLD.

MSA BOMB DOG TEAMS MAINTAIN BUSINESS-AS-USUAL

- A major professional sports stadium with over 300 outside deliveries each week utilizes an MSA Bomb Dog Team to ensure that any entity with access to the stadium is properly screened without interrupting the high-paced flow necessary to maintain operations.
